Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 31 March 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Wang (5394233).

Referring to claim 1, Wang shows a light source (figure 1 Ref 10), a light reflecting means (figure 1 Ref 11) wherein said light reflecting means has a function of retroreflecting incident light (column 3 lines 30-44).

Referring to claim 2, Wang shows a light receiving sensor and a light source disposed on an opposite side as the light reflecting means (figure 1).

Referring to claim 3, Wang shows an optical member that transmits a portion of light and reflects a portion of light (figure 1 Ref 6).

Referring to claim 4, Wang shows a light source that is a laser (figure 1 Ref 10).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 5-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over King (5634855) in view of Wang (5394233).

Referring to claims 5 and 6, King shows a device for measuring a velocity of a passed object (figure 1). Wang shows a light source (figure 1 Ref 10), a light reflecting means (figure 1 Ref 11) wherein said light reflecting means has a function of retroreflecting incident light (column 3 lines 30-44), and an optical member that transmits a portion of light and reflects a portion of light (figure 1 Ref 6). It would have been obvious to modify King to use the light transmission and detection means of Wang because this allows electro-optical components to be contained in one place making it easier to supply power to the electronics.

Referring to claim 7, Wang shows a light source that is a laser (figure 1 Ref 10).

Referring to claim 8, King shows a device for measuring a velocity of a passed object that is a golf club head (figure 1).
